

## PRODUCT TECHNICAL DATA SHEET

### DAZLEX - Combined Wax and Cleaning

#### DESCRIPTION

CSL's DAZLEX is a combined vehicle cleaning and wax polishing agent, containing genuine Carnuba Wax. No rinsing. Contains no inorganic additives or other materials likely to set up corrosion and is free from organic solvents.

**DIRECTIONS:** Shake or stir before use. Add up to one tablespoon to 2 gallons of tepid water and mix. Neither use hot water, nor exceed the recommended strength and avoid washing vehicles while they are exposed to hot sun. Using generously, start at the highest point, treating one panel at a time for the best results. When hand cleaning, remove excess solution with a cloth. Well cleaned surfaces will dry readily and require no rinsing.

To prevent wax on glass, wipe windscreen with clean damp cloth immediately after application. For best results, polish when dry with a soft dry cloth. Allow half an hour for wax to harden before exposing to rain.

**STORAGE:** Store in a cool, dry place protected from frost.
