

PRODUCT TECHNICAL DATA SHEET

SANITEX - Power Bleach

DESCRIPTION

SANITEX is our highly concentrated power bleach, designed to keep surface areas germ-free. SANITEX is pale yellow in colour with a strong chlorine odour. SANITEX proves to be very economical as it is so concentrated. It can be diluted down with water, giving you more value for money. As well as economical, SANITEX is particularly versatile as not only is it an excellent bactericidal but will clean brilliantly and act as a cold water rinse for clothes.

DIRECTIONS: TOILETS AND URINALS - Last thing at night or when leaving the toilet areas for some time, pour a little of the power bleach around the bowls to keep them pure and germ-free.

IMPORTANT: Never mix SANITEX with other toilet cleaners or chemicals.

SINKS AND BASINS - For the purpose of keeping such areas clean, sparkling and germ-free, simply add a quarter cup of SANITEX to one gallon of water and simply wipe over the surface areas. Pour a little of the liquid down the plug-hole to sanitize the unseen areas.

WHITES - It is essential that before putting SANITEX onto clothes, that you always dilute it down first. Mix half a cup of SANITEX to 8 gallons of cold water. Soak for a short time then rinse thoroughly. **N.B.:** Coloured items will fade or completely change colour. **CAUTION:** Do not use on metal surfaces such as enamelled baths, plated articles, chrome, etc., woollens, silks, rayon, waffle, seersucker, pique or drip-dry materials.

STORAGE: Keep stored upright in a cool, dry place protected from frost. Do not mix with other chemicals or cleaners. Keep well away from children and animals.
